

Lockout / Tag out

This course will provide a student with the extensive knowledge to perform proper lockout tagout, including the six steps for LOTO, develop an HECP, and identify proper EIDs and LOTO devices. The student will be able to understand when group LOTO is necessary and understand the requirement for contractors, communication and training. The required amount of time to complete the course is dependent upon your knowledge of workplace safety. You have up to six months to complete the course.

Upon successful completion of this course, the student will be able to determine when LOTO is applicable, understand the importance of proper LOTO, and possess the ability to develop a comprehensive LOTO program. The student will have the knowledge and skills to perform, as well as train on, LOTO in a facility with emphasis on machine-specific procedures, limitations, and roles and responsibilities of affected and authorized personnel.

Our Lockout Tagout Specialist Certification covers:

- Definition of LOTO
- Hazardous Energy Control Procedure (HECP)
- Exceptions to Rule (Cord and Plug)
- Energy Isolation Devices
- Lockout Tagout Devices
- Six Step Process to Proper LOTO
- Writing Your LOTO Program
- Group LOTO
- Training for Affected and Authorized Personnel
- Periodic Inspections

- OSHA Interpretations & Rulings

Duration: 13 hours

Exam: Must score 80% to pass

Recertification: A refresher course and exam will be required every three years.
