

Machine Guarding

Workers who operate and perform maintenance or setup on machinery in the workplace are at risk of contact with machine parts, processes or other components. Unguarded or inadequately guarded machinery are a leading cause of these injuries.

Our Machine Guarding certification covers:

- Introduction
- Safeguarding Definitions and Legislation
- Machine Components, Movements, and Actions
- Guards, Safeguarding Devices, and Safe Work Procedures
- Identifying Hazards and Assessing Risks
- Implementing Controls: Selecting Safeguards

Duration: 2 Days

Exam: Must score 80% to pass
